

## March 6, 2017 Security Bulletin: Cyber Vulnerability Affecting Certain Dahua IP Cameras and Recorders

### Summary

We were recently made aware of a cybersecurity vulnerability that affects certain Dahua recorders and IP cameras. It's important to note that the vulnerability is not the result of a malicious attack on any specific installation where our products are deployed; it was discovered by Bashis conducting independent testing of various suppliers' surveillance products.

The models below have been identified as being affected by this vulnerability. We are continuing to investigate additional models and will provide updates as they arise.

Users should immediately download updated firmware from the Dahua USA Wiki and apply the update.
