

Blackbody Device

Extended Warranty

Extended Warranty Details

- The Extended Warranty Card can be used only for Dahua Temperature Calibration Devices (specifically Model Number JQ-D70Z in North America. Note that the card is not sold in Canada).
- To activate the extended warranty, please log in to the Dahua RMA Portal: <https://rmaus.dahuasecurity.com> and input the Card Number, Password, and Serial Number for your device.
- An Extended Warranty Period begins when the last Warranty Period expires and is valid for one (1) year. Two (2) Extended Warranty Periods are allowed for each Device. The following options apply to each Extended Warranty Card:
 - An extended warranty period may be activated even if the previous warranty period has expired.
 - An extended warranty may be purchased up two years after the purchase date of the Blackbody device.
- This Extended Warranty Card is supplemental and subject to Dahua's Limited Hardware Warranty, Return & Exchange Policies, and RMA Process ("Warranty & RMA"). Please refer to https://us.dahuasecurity.com/?page_id=1074
- For questions about requesting service for your device(s), please email the Dahua RMA team at rma.support@dahuatech.com.
- Dahua offers advanced replacement if the Blackbody device requires repair. To request a replacement, initiate a RMA reservation and send a snapshot of the device's label. Then, return the faulty device to Dahua RMA once you receive the replacement Blackbody device.
