

## Security Notice — Statement on Vulnerability of ToolBox

### Notice ID

*DHCC-SN-202202-002*

### First Published

*2022-02-27*

### Summary:

ToolBox is a platform that integrates Dahua product supporting tools, which is used for tool installation and update. There is a DLL hijacking vulnerability in ToolBox V1.010.0000000.0. The attacker puts the malicious DLL file with the specified file name into a specific directory of the attack target, and by loading the malicious DLL, the command execution and the permission to hijack the operation of ToolBox can be realized.

At present, Dahua has completed the repair of this vulnerability, please pay attention and upgrade to the V1.010.0000001.0. Version in time.
