

LincX2PRO Series

Dahua's doorbell cameras stream live video with two-way talk directly to your mobile device enabling you to communicate with visitors at any time and from anywhere.

Whether you are on vacation, screening visitors or just too busy to answer the door, Dahua's free DMSS app allows you to communicate in real-time with anyone at up to ~16 feet (DH-DB6I). With the built-in microphone and speaker, employees working alone and homeowners alike will feel safe that they can interact before opening the door.

Dahua video doorbells send an instant alert when a person presses the device button or steps within the doorbell's range with its built-in motion sensors.

Thanks to the onboard SD card slot, Dahua's video doorbell puts security into the hands of the customer. Users can feel safe that their video is stored on the physical device versus on a network for privacy concerns. Plus, there are no monthly storage or service fees. Just install, set-up and record directly to the device or a Dahua compatible XVR or network video recorder. To save on storage, the camera only records on motion.

Compatibility

View LincX2PRO video on Dahua's Mobile DMSS app (for iOS and Android).

- Secure video storage onsite. No cloud subscription needed.
- Instant Live View. No latency from the event to the screen.
- Powered by a wired connection. No battery required.

LincX2PRO Series

Proactive Security

The 5MP video doorbell features a 140-degree wide field-of-view with human detection, so that when it sees a person, a notification is automatically sent to your mobile Android or iOS device.

Full Solution

Dahua's video doorbell is excellent for a streamlined, one stop shop, full eco-system without the hassle of using separate apps.
